Dear Sharon:

Thank you. It seems that the EPA's position as stated in this letter is pretty clear. We were wondering if we could have a chance to speak about it briefly to see if there have been any changes or other developments since that letter that have changed EPA's stated positions. Perhaps we could set a time – it would be great to meet you, as Miriam has said a lot of great things.

Thank you in advance for your consideration.

Regards,

John

Thanks, Sharon. Our clients' interests are separate from the Frost Street parties' interests and are not represented by Kevin, although we are trying to coordinate with him so that a unified response to EPA's requests is presented

I am still mostly in one piece – but it was an awful year. I hope you, Joe, and family are none the worse for wear.

Regards, M

So sorry. I only sent the letter to the parties that we were responding to but you are right, your client's interests I guess are represented by Kevin. I will include you in all communications moving forward.

I hope you survived the year in one piece and that you are doing well.

Best,

Sharon

Subject: New Cassel/Hicksville Groundwater Contamination Superfund Site

Hi Sharon. I hope this finds you well.

I've attached a copy of the September 2, 2020 letter from EPA to the attorneys for the plume groups working on the NCHGCS Site investigation in response to the USEPA UAO. John Parker and I just received a copy of the letter today, from Kevin Maldonado. As you will see, the letter was not addressed to me or anyone on behalf of my clients, Utility and Nest, who, as you know, are parties to the UAO as part of the Eastern Plume.

This is a request that you ensure that John and I are copied on communications directed to the NCHGCS Site PRPs so that we can protect our clients' interests.

Thank you.

Regards, M
